Subject: Application for the Position of Frontend Software Engineer

Dear Hiring Manager,

I am writing to express my interest in the Frontend Software Engineer position at Echologyx. As a final-year Computer Science student at Green University of Bangladesh, I bring a strong foundation in web development along with real-world experience gained through a 150+ hour internship at 9AM Solution. There, I developed the complete frontend of an HRMS module using React, TypeScript, and Tailwind CSS.

My project experience includes building e-commerce platforms like DigiKart and designing responsive user interfaces using Canva for layout planning and UI visualization. I have hands-on experience with RESTful APIs, Git, and cross-browser testing. I also manage a custom product business (Cover Bhai 2.0), which has sharpened my skills in customer experience, frontend design, and digital product handling.

I am passionate about building fast, accessible, and user-friendly web applications. I stay up-to-date with modern frontend trends, including the MERN stack and Next.js, and am committed to continuously learning and improving.

I have attached my resume and GitHub portfolio for your review. I would be thrilled to bring my energy, creativity, and dedication to the vibrant team at ....

Thank you for your time and consideration.
Sincerely,
Md. Ashikur Rahaman Api
